

Symphony Meetings

Immediate, immersive, and protected communications

Connect in real time with audio, video, and screen sharing directly within your Symphony platform. Maintain context while you quickly share screens and apps with teams inside and outside your organization, at your desk or on-the-go. All communications are protected by the same robust control and compliance features used on Symphony. Lose the 10-minute meeting tax and start Meetings today.

IMMEDIATE CONNECTION

Start Meetings instantly from desktop or mobile to share crucial information with the whole team. All active team Meetings are easy to find and join directly from chats.

ROBUST COMPLIANCE

Manage feature entitlements for using any combination of audio, video, and screen sharing. Meetings respects information barrier rules and all user actions are timestamped and included in content export.

PERSONALIZED SETTINGS

When you join the Meeting, it will be embedded in your chat window. If you want more focus, just use your settings to pop out the Meeting or view full screen.

SELECTIVE RECORDING

Identify key employees for recording. Selective recording will apply whether you start Meetings or join another's meeting in the middle.

CUSTOMIZED MEETINGS

Start Meetings with audio and add a video feed or share a screen when you need. Use thumbnails to monitor the active speaker, focus on a specific individual, or mute background noise.

FLEXIBLE DEPLOYMENT

Deploy high-availability Meetings infrastructure across the global enterprise network on-premises or deploy as a cloud service.

SYMPHONY MEETINGS TECHNICAL DETAILS

	FEATURE	DETAIL
 MEETINGS TYPE	Chat Room Members Only	Available today for desktop and iOS
 VIEWS	Embedded View	Multi-tasker mode
